

AN RPM COMPANY

GLOBAL LEADER IN BUILDING DRYING

DRI-POD FLOOR DRYER

Dry floors and hard surfaces **FAST!**

With its 360° outlet grill design, the Dri-Pod pulls warm, dry air from above and directs it across the entire floor at once—covering an area up to 3 meters across. Simply place the Dri-Pod in the center of a room and dry carpet, tile, vinyl or hardwood floors faster than ever.

Dry faster and reduce slip hazards.. The Dri-Pod directs air across the floor in all directions to enhance evaporation and quickly remove surface moisture, dry fast and help reduce possible slips!

Save time. Use the Dri-Pod to dry carpets or hard surface floors quickly after cleaning, leaks or spills. Simply place the unit in the area to be dried, and then leave it to work while you move onto the next task.

Lightweight and easy to transport. Simply pick it up and move it to the next location. It's easy and fast!

MODEL	F451-230V
WEIGHT	4.8 kg
DIMENSIONS (D x W x H)	38.5 x 38.5 x 22.5 cm
CFM	1270 CMH
AMP DRAW	0.5 amps
CONSTRUCTION	Injection moulded housing, wire grill
SAFETY	CE approved

For professional, reliable, robust building drying and the support you deserve...
